# statistics.

**Statistics, or Stats,** are modifiers that affect a Toon's gameplay elements. Every Toon has 6 stats: Health, Skill Check, Movement Speed, Stamina, Stealth, and Extraction Speed. All stats except Health are ranked in Stars. 5 Stars hold the highest Stat value, and 1 Star Stats hold the lowest. The more Stars the Stat has, the more potent it is.

Below is a list of values for all stats (except Health) based on how many Stars each Stat has.

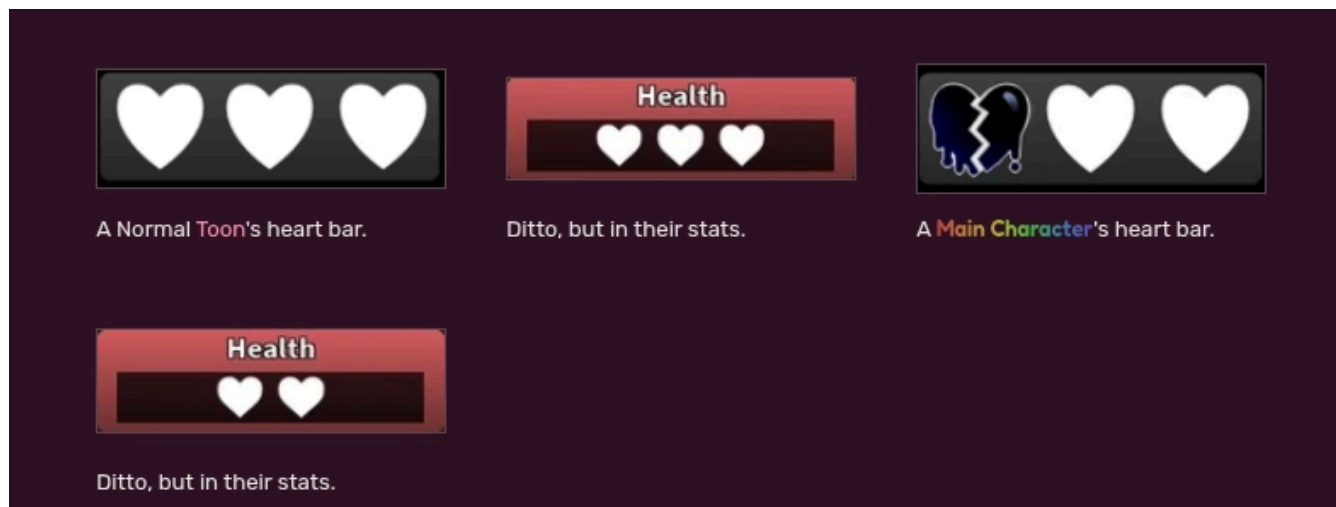

Stats/Star Count		★	★★	★★★	★★★★	★★★★★
 Skill Check	Size	50	100	150	200	250
	Value	1	1.5	2	2.5	3
	Speed	1	2	3	4	5
	Clicks	8	7	6	5	4
 Movement Speed	Walking	10	12.5	15	17.5	20
	Running	20	22.5	25	27.5	30

 Stamina	100	125	150	175	200
 Stealth	0	5	10	15	20
 Extraction Speed	0.75	0.85	1.00	1.20	1.50

Each Toon has a unique stat spread. Normal Toons have 15 Stars in total, while Main Toons receive an extra Star, having 16 Stars in total. Dandy, Dyle and Shrimpo are the only exceptions to this rule, with Shrimpo having only 5 with one Star for each stat, and Dandy and Dyle having 25 Stars with five Stars in each Stat.

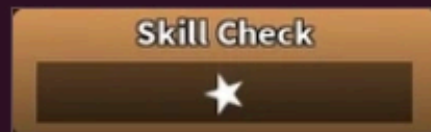

## Health

Health displays how much damage you can take from Twistedds before your Toon dies. Most toons Start with 3 , while Main Characters only have 2 Hearts.

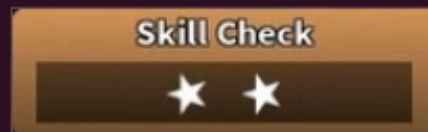

## skill check

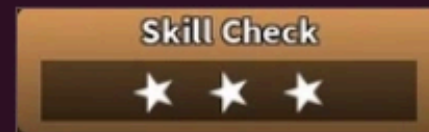

Skill Check determines how big the Skill Check window is, how much your extraction progress is increased for hitting a perfect Skill Check (the Golden area) and how fast a Skill Check will go (when on a **Circle Machine**). Light Producing Toons produce a larger amount of light than other Toons when a Blackout occurs. They are signified by a lightbulb icon in their stats menu. The only Light Producing Toons as of v0.12.6 are Astro, Brightney, Connie, Rudie, and Vee. These Toons also have coloured lights, depending on if the Toon has a skin or not. Astro has a blue light, Brightney has a white light, Connie has a cyan light, Rudie has a red light, and Vee has a green light.

# Illness Immune Toons

Illness Immune Toons are Toons who are immune to the puddles produced by Ichor Leaks and do not gain the Debuffs associated with it, in this case being Illness III . They are signified by a broken leaky pipe in their stats menu. The only Illness Immune Toons as of v0.12.6 are Flutter, Blot, and Connie. As of now these Toons are immune due factors like flight for Flutter and Connie, or in Blot's case, being made of pure ink. However, they aren't immune to the slowness when walking through puddles.
